

Continuously monitors over 20 physiological parameters without invasive A-lines, catheters, wires or arm cuffs

- 1 Pulse pressure waveform
- 2 Continuous central aortic blood pressure (Systolic, diastolic & MAP)
- 3 Real-time ECG waveform*
- 4 Real-time heart rate
- 5 Pleth waveform*
- 6 Continuous pulse oximetry and perfusion index*
- 7 Cardiac output & index trends
- 8 Continuous cardiac output and cardiac index
- 9 Stroke volume & index trends
- 10 Continuous stroke volume and stroke volume index
- 11 Systemic vascular resistance trend
- 12 Systemic vascular resistance
- 13 Respiratory rate trend
- 14 Real-time respiratory rate
- 15 Stroke volume variability
- 16 Cardiac power output and cardiac power index
- 17 Fluid response: Instant and continuous measurement of the left ventricle's ability to increase stroke volume in response to fluid administration bolus or passive leg raise
- 18 NEWS, MEWS and NEWS2 early warning scores
- 19 Body temperature*

Additional parameters not pictured: Blood pressure trend, EtCO2*, heart rate variability, pulse pressure variation, left ventricular ejection time and rate pressure product.

Tablet display is customizable to fit your monitoring needs

*With additional wireless sensors.
